

OUR PROFESSIONAL VALUES

THE CENTRALITY OF THE PERSON

We put the individual at the centre, promoting their empowerment. We see the organisation as a place for working and socialising, connecting people's energies to the organisation's goals.

THE VALUE OF THE GROUP

We recognise the value of the group for the development of people and the transformation of organisations.

The group as a source of energy, a space for relationships, identity, culture and the creation of meaning.

VALUE FOR THE CUSTOMER

We provide value to the client system, using a systems approach.

Our clients' challenges are our starting point for building a shared diagnosis and designing a customised journey.

We make every activity with the client an opportunity for development by leaving space for reflection. We release methods and techniques for the client to increase awareness and autonomy.

THE MULTIDISCIPLINARY TEAM

We enhance the different sensitivities and skills in the consultancy team in order to ensure multiple points of view.

We constantly promote innovation to design new methods and techniques of intervention.

We establish a consultancy relationship with our clients based on equality. We are partners and never replace the role and responsibility of the client.
